Das Ziel der Royal Air Force war klar definiert: "to destroy town" Persönliche Schicksale erzählen mehr als bloße Opferzahlen. Darauf legt der Autor in seinem neuen Recherchebericht besonderen Wert. Ein Beispiel ist die Tragödie der Düsseldorfer Familie Lohmar, die in dieser Bombennacht nahezu ausgelöscht wurde. Fesselnd sind die Erlebnisse der 16-jährigen Gisela, die im Luftschutzkeller überlebte. Marcel Lesaar spannt einen Bogen von den Planungen der Royal Air Force über den Angriff bis hin zu den fatalen Folgen für die Bewohner Düsseldorfs und weiterer Städte. Auszüge aus Zeitungsberichten und aus dem Tagebuch von Joseph Goebbels zeigen, wie die politische Führung mit den Angriffen der Alliierten umging und sie für Propagandazwecke nutzte. Tod oder Kriegsgefangenschaft waren für die britischen Flieger mögliche Folgen eines Abschusses. Dem Bombenschützen Ronald Pearce jedoch gelang eine atemberaubende Flucht. Über 300

Abbildungen veranschaulichen die folgenreichen Geschehnisse dieser Kriegsnacht.

It looks at the cars on the road, and the racing Type 47 derived from the road cars which competed in the small capacity Group 6 class, as well as featuring in historic racing today. With owners' impressions and interviews with ex-Lotus employees, the book provides a valuable insight into owning, running, and racing these iconic cars.

André Lefebvre, and the Cars He Created at Voisin and Citroën Gijsbert-Paul Berk 2011-11-01 Together with his colleagues at Citroën, Andre Lefebvre created the Traction Avant (1934), the TUB (1939) – Citroën's first front wheel drive utility van that was succeeded by the H and HY vans (1947) – the Deux Chevaux (1948), and, last but not least, the DS (1955). From 1923 to 1931 Lefebvre also designed several highly original and outstanding competition cars and record-breaking automobiles for Voisin. He even drove some these cars in races and record attempts. It is obvious that during his 16 years with Gabriel Voisin he was very much influenced by the ideas of this illustrious aviation pioneer and car manufacturer. The experience gained during that period gave him the self-confidence to persuade his successive bosses at Citroën that his unorthodox approach to automobile design was what the company needed; first he convinced André Citroën, later Pierre Michelin, then Pierre-Jules Boulanger, and finally Robert Puiseux and Pierre Bercot. His oeuvre for Citroën alone earns him a place of honour among the great automobile designers of the past century. The fact that most present-day cars still carry the DNA of his design philosophy makes him stand out above other automotive pioneers and innovators. That is why it is amazing that so little is known about this fascinating and brilliant engineer. This book was written in order to remedy that, and to pay tribute to André Lefebvre: the passionate pioneer who left car enthusiasts around the world such an important heritage.

Russian Motor Vehicles Maurice A. Kelly 2009-07 There has been nothing published outside of Russia concerning the activities of its motor industry, by 1937 the Soviets had become the largest producers of motor vehicles in Europe, albeit with the help of Henry Ford The author decided to concentrate on the work of the pioneers in Czarist Russia, for their efforts were more diverse than those of their counterparts in the Soviet era. All the manufacturers of motor vehicles, certain accessories, military machines, and even aero engines are recorded in this unique book.

British Lorries of the 1960s Malcolm Bobbitt 2009-10-01 British commercial manufacturers played a prime role in boosting Britain's economy during the 1960s, especially as many vehicles were exported worldwide. This highly visual study of British lorries of the 1960s captures in 120 illustrations this often understated but very necessary work, which was undertaken day and night, 365 days a year. The comprehensive text reveals much about the marques that were everyday names, along with information about Britain's road haulage and commercial vehicle industries.
