JEBPS Vol 14-N1 Journal of Evidence-Based Practices for Schools 2014-03-04 The Journal of Evidence-Based Practices for Schools is a leader in publishing research-to-practice articles for educators and school psychologists. The mission of this journal is to positively influence the daily practice of school-based professionals through studies demonstrating successful research-based practices in educational settings. As a result, the editors are committed to publishing articles with an eye toward improving student performance and outcomes by advancing psychological and educational practices in the schools. They seek articles using non-technical language that (1) outline an evidence-based practice, (2) describe the literature supporting the effectiveness and theoretical underpinnings of the practice, (3) describe the findings of a study in which the practice was implemented in an educational setting, and (4) provide readers with information they need to implement the practice in their own schools in a section entitled Implementation Guidelines. The Journal of Evidence-Based Practices for Schools differs from other scholarly journals in that it features articles that demonstrate empirically-based procedures for readers to apply the practice in their setting.

Handbook of Fathers and Child Development Hiram E. Fitzgerald 2020-10-01 This handbook provides a comprehensive review of the impact of fathers on child development from prenatal years to age five. It examines the effects of the father-child relationship on the child's neurobiological development; hormonal, emotional and behavioral regulatory systems; and on the systemic embodiment of experiences into the child's mental models of self, others, and self-other relationships. The volume reflects two perspectives guiding research with fathers: Identifying positive and negative factors that influence early childhood development, specifying child outcomes, and emphasizing cultural diversity in father involvement; and examining multifaceted, specific approaches to guide father research. Key topics addressed include: Direct assessment of father parenting (rather than through maternal reports). The effects of father presence (in contrast to father absence). The full diversity of father involvement. Father's impact on gender role differentiation. Father's role in triadic interactions of family dynamics. Father involvement in psychotherapeutic family interventions. This handbook draws from converging perspectives about the role of fathers in very early child development, summarizes what is known, and, within each chapter, draws attention to the critical questions that need to be answered in coming decades. The *Handbook of Fathers and Child Development* is a must-have resource for researchers, graduate students, and clinicians, therapists, and other professionals in infancy and early child development, social work, public health, developmental and clinical child psychology, pediatrics, family studies, neuroscience, juvenile justice, child and adolescent psychiatry, school and educational psychology, anthropology, sociology, and all interrelated disciplines.
