African Rhino Richard Emslie 1999 The black and the white rhinoceros have become flagship species for international conservation. They are significant not only for the continuation of a major evolutionary heritage, but also as symbols for the protection of African savannahs. The battle for the survival of these species has been marked by some notable successes and sadly, many failures, and the situation is still critical. The international horn trade ban and the domestic bans imposed in most traditional user states

have driven the trade further underground, in some cases inflating prices and making illegal dealing even more lucrative. This Plan is aimed at donors, government and non-government organizations, and all those involved in rhino conservation. It outlines the actions and strategies needed to catalyse support for these majestic animals, and help secure their future in sub-Saharan Africa. The overall conclusion is that, given the political will, stability and adequate field expenditure, rhinos can be conserved in the wild.

Backpacker 2001-03 Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Deep Green Resistance Derrick Jensen 2020-03-01 "In diesem Buch geht es darum, zurückzuschlagen. Die vorherrschende Kultur, genannt Zivilisation, tötet den Planeten. Und es ist längst an der Zeit für diejenigen von uns, denen das Leben auf der Erde etwas bedeutet, die notwendigen Maßnahmen zu ergreifen, um diese Kultur daran zu hindern, alle lebenden Wesen zu zerstören." Tiefenökologischer Widerstand ("Deep Green Resistance") beginnt dort, wo die Umweltbewegung aufhört: Denn für die Anhänger dieser Idee ist die industrielle Zivilisation unvereinbar mit dem Leben. Sie glauben nicht daran, dass irgendeine Form von zukünftiger Technologie dem Klimawandel, dem Artensterben, der Luftverschmutzung, der Bodenversiegelung oder irgendeiner anderen ökologischen Katastrophe, die die Menschheit ausgelöst hat, Einhalt gebieten kann. Auch mit "bewusstem" Konsumieren oder "nachhaltigem" Wirtschaften lässt sich der Planet Erde nicht retten, sondern nur mit einer ernsthaften Widerstandsbewegung, die die zerstörerische industrielle Wirtschaft zum Erliegen bringt. Die AutorInnen Derrick Jensen, Lierre Keith und Aric McBay vertreten diesen radikalökologischen Ansatz, der in den USA und an anderen Orten immer mehr AnhängerInnen findet. In ihrem erstmals auf Deutsch übersetzten Manifest erzählen sie davon, wie täglich 200 Spezies von der Erde verschwinden, jährlich eine Fläche im Ausmaß des Aral-Sees verwüstet wird und wie pro Jahr 23 Millionen Menschen an den Folgen von Wasser-, Luft- oder Erdverschmutzung sterben. Sie erzählen von einer Welt, die kurz vor dem Ableben steht – wenn wir uns nicht sofort organisieren und handeln. Das Buch "Deep Green Resistance" erläutert bis ins Detail unterschiedliche Möglichkeiten des tiefenökologischen Widerstands, von gewaltlosen Aktionen bis zur Guerilla-Kriegsführung. Und es nennt die Bedingungen, die für den Erfolg dieser Optionen erforderlich sind. Es ist ein Handbuch und Aktionsplan für all jene, die entschlossen sind, für diesen Planeten zu kämpfen und den Kampf zu gewinnen.
