Divergent Thinking for Advanced Learners, Grades 3–5 Emily Hollett 2022-07-29 Divergent Thinking for Advanced Learners, Grades 3–5 will develop students' specific creative thinking skills. Divergent thinking is a skill which helps students approach problems with a flexible and open mind. Working through the lessons and handouts in this book, students will learn to examine problems from multiple perspectives and fluently generate varied solutions. This curriculum provides cohesive, scaffolded lessons to teach each targeted area of competency, followed by authentic application activities for students to then apply their newly developed skill set. This book can be used as a stand-alone gifted curriculum or as part of an integrated curriculum. Each lesson ties in both reading and metacognitive skills, making it easy for teachers to incorporate into a variety of contexts.

Academic Writing Skills 2 Teacher's Manual Peter Chin 2012-05-02 A three-volume essay writing course for students in American English. Academic Writing Skills 2 takes students through a step-by-step process of writing expository, argumentative, and compare and contrast essays. It is appropriate for students wishing to focus on specific essay types that require the use and integration of sources to complete academic writing tasks.

Adult Basic Literacy Curriculum Guide and Resource Book British Columbia. Ministry of Advanced Education and Job Training 1987

Resources for Teaching Middle School Science Smithsonian Institution 1998-03-30 With age-appropriate, inquiry-centered curriculum materials and sound teaching practices, middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them. Resources for Teaching Middle School Science, developed by the National Science Resources Center (NSRC), is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8. The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards. This completely new guide follows on the success of Resources for Teaching Elementary School Science, the first in the NSRC series of annotated guides to hands-on, inquiry-centered curriculum materials and other resources for science teachers. The curriculum materials in the new guide are grouped in five chapters by scientific area--Physical Science, Life Science, Environmental Science, Earth and Space Science, and Multidisciplinary and Applied Science. They are also grouped by type--core materials, supplementary units, and science activity books. Each annotation of curriculum material includes a recommended grade level, a description of the activities involved and of what students can be expected to learn, a list of accompanying materials, a reading level, and ordering information. The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books, and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive, and thoroughly indexed--and the only guide of its kind--Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum specialists, advocates of hands-on science teaching, and concerned parents.

The Essentials of Teaching Health Education Sarah Benes 2021 The Essentials of Teaching Health Education, Second Edition, presents a skills-based approach to teaching K-12 health education, offering practical strategies for curriculum design and program development and an individualized approach to student learning. Its ancillaries facilitate the learning
